

Corporate Near-Term Tool

Version: 2.3
Support: info@sciencebasedtargets.org

Scope 1&2 Tool User Guide

- Section 1: Input emitters and activity data as required by the selected Target Setting Method. Required input fields are highlighted in yellow.
- Section 2: Summary of emissions reduction target data and visualizations. Sector-specific intensity convergence / Sectoral decarbonization approach (SDA).
- Section 3: Summary of emissions reduction target data and visualizations. Cross-sector absolute reduction / Absolute contraction approach (ACA).
- Section 4: All target modelling output data, SDA & ACA.

Section 1. Input data

Enter your company name	Neo Fashion Ltd
Target setting Method	Absolute Contraction Approach
SDA sector	Not applicable
Base year	2023
Enter year 1 (Scope 1)	2023
Base year 1 (Scope 1)	3,333
Enter year 2 (Scope 1)	2030
Base year 2 (Scope 1)	2,830
Target year	2030
Target year 1 (SDA)	
Target year 2 (SDA)	
Most recent year (SPT)	2024
Year 1 (Scope 1&2)	ICDn
Year 2 (Scope 1&2)	ICDn

IMPORTANT NOTICE:

This tool is intended to support companies in their modelling of science-based emissions reduction targets, as well as to assist companies and interested third parties in assessing and evaluating companies' targets. However, to be approved by the Science Based Targets initiative, companies need to make sure that targets fulfil the SBT criteria. Please review the SBT Step by Step Process to access the latest criteria and resources: <https://sciencebasedtargets.org/step-by-step-process>

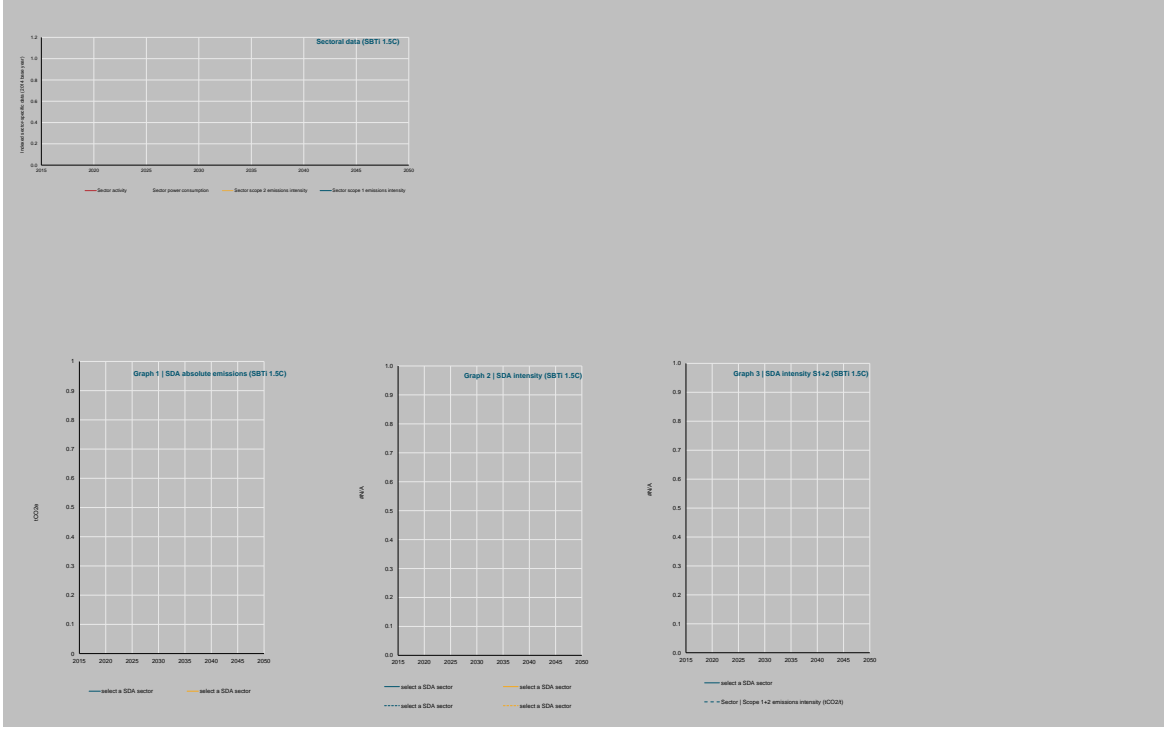

Also please note that the SBTi assesses "forward-looking" ambition of targets by using the year the target is submitted to the initiative (or the most recent GCG meeting). For further information, consult the SBTi Corporate Net-Zero Standard: <https://sciencebasedtargets.org/resources/Net-Zero-Standard-Criteria.pdf>

Please help us improve this tool by reporting issues related to functionalities and formatting.

Update notification:
Please note that as of July 15th 2022, SBT Tool versions 1.2.2 and earlier are no longer supported. For clarifications on tool version eligibility please contact info@sciencebasedtargets.org.

Please see results in Section 3 below

Section 2. Sector-specific intensity convergence / Sectoral decarbonization approach (SDA)

Section 3. Cross-sector absolute reduction / Absolute contraction approach (ACA)

1.5 degree scenario (1.5C)
